PERSONAL INFORMATION

FULL NAME   : Dombagaha
                 Pathirannehalage
                 Ishan Gayantha

NAME WITH INITIALS: D. P. I. Gayantha

Date of Birth   : 04-04-1995

Nationality   : Sinhalese (Sri Lankan)

Religion   : Buddhist

EXPERIENCE

As a developer,

I have developed both backend and frontend (full-stack development) of many websites using HTML, JavaScript and PHP.

I did my final project on natural disaster management solution which leads to develop collaborative system design with machine learning applications. Therefor I used JavaScript, Android and TensorFlow. (https://github.com/hackishmax321/weather_pannel)

Projects undertake at **CeylonLabs (03-2021 to 09-2021)**:

Government Project on Divisional Secretariat Offices Development Management:
Contributed to the design and development of a comprehensive system to manage and track development works in Divisional Secretariat offices.
GitHub Repository: (https://github.com/CeylonLab/podu-jana-palama-web.git)

Trix - Roadway Assistant:
Played a key role in the development of "Trix," a roadway assistant application designed to enhance road navigation and user safety.

Point of Sale (POS) Systems:
Collaborated on the development of multiple POS systems, ensuring efficient and user-friendly solutions for retail and service industries.

Currently works as a freelancer developer delivering tailored software and web solutions and collaborating with clients to meet their specific project requirements.

As an active developer of several group assignments, I participated developing;

Student Management System using JSP
(https://github.com/hackishmax321/student_management_system-jsp-)
Garbage Disposal Service using JavaScript and PHP
(https://github.com/hackishmax321/garbage_disposal_service)
